Luxury Vans & Off-Road Trucks

Waldoch is a nationwide **FORD** approved specialty vehicle manufacturer.
We specialize in building unique packages to fit the lifestyle of each consumer.

Ford

LUXURY CONVERSION VANS TO FIT YOUR PLEASURE

The Waldoch conversion van has changed dramatically over the years. Back in the 70's a disco ball, green shag carpet and some stained plywood finished a clean and quality conversion. Today wood grain is out and high quality is in, with French stitched ultra-leather, plush interior, vinyl wood flooring, multi-color LED lighting, and fold down TV screens larger than are in some homes. Our vans have a polished exterior with unique graphics, paint to match running boards. We remove every black textured plastic piece and paint it to compliment the overall clean and elegant look. Our top of the line Galaxy Van package features color keyed side moldings, bumper insert fog lights and all trim pieces painted for a polished and elegant look.

Premium seating features leather fully adjustable captain's chairs with added comfort like power lumbar power recline and heat for lasting comfort. A fully automatic rear bench that reclines to a bed is a great feature for those impromptu rest stops on a long road trip. At each passenger seat enjoy all the comforts and conveniences you would expect from a Waldoch van like USB charging ports, individual passenger lighting and climate control venting. Close all the shades and use the LED mood lighting to enhance the cinema experience provided by an LCD display and surround sound TV that flips down out of the headliner 32" large and LED 1080P screen.

SHUTTLE CONVERSION

Shuttle vans are great for so many different aspects of the road, when you get a Waldoch shuttle passenger van it's the comforts that makes the difference. The Ford Transit Van works great for the shuttle hotel industry. Ford came out with great vans to build nice custom vans on. The Ford Transit is a very popular model to use for the hotel shuttle service, Airport Shuttle Service, Daycare Buses, Shuttle Buses, Shuttles with Mobility / Wheelchairs and Specialty Shuttle Bus vans. Many of the companies use the Shuttle Buses for charter and traveling from place to place. The seating for a shuttle Bus ranges from 10 Passenger up tu 15 Passenger. Most of our Airport Shuttles are 13 Passenger with a nice luggage rack. Waldoch is a Custom Conversion Van Shuttle Manufacture and has been building shuttles Vans since 1974. Waldoch is a QVM for Ford Motor Company with the Transit Van.

- Heavy Duty Altro Commercial Flooring
- Webasto Rear Heat & Air Conditioning with overhead venting
- Insulation throughout the van giving it great sound deadening
- High durable Plastic walls
- Available Power Side Step Passenger Side Only (16" wide)

MOBILITY CONVERSION

MOBILITY

The Galaxy vans and the Waldoch Shuttle and Limo Vans can have a handicap wheelchair put in any one of the 3 models Waldoch manufactures. Starting with the Galaxy Transit Conversion van, you take of the first row of seating and the mobility lift mounts right at the door. The Waldoch Mobility vans can be put in the side or the rear door. Waldoch works with mobility installers all over American. If you have a mobility company you are working with and would like to get a full size van. Give us a call and we will help you get the van of your dreams and keep your mobility company right in your home town. They know you the best with the different service needs you might have over the year. Waldoch does have a local installer that they work with if you don't have one you are working with. Handicap full size conversion vans can be a lot to take on that is why we have a proven way we have done it and it's leaving the customer with a smile. Handicap vans can have the B&D transfer seats that will allow the seat to come back and pick the person up to move them in position if it's not easy to get into the driver or passenger seat. We also offer the ability to lock your wheel chair right in the passenger or driver position of the vehicle. It's called the EZ lock system. Simply push a button to release and you are set. The Q'straint tie down is our most popular and cost effective way to hold down the wheel chair, you do need a second person to help tie the person in the wheel chair or motorized chair down. The hand controls for the wheelchair and handicap vans is the best way for you to be in the driver seat and brake and gas with your hands, not having to worry about the pedals below. the Handicap steering wheel knob is a great way so you don't have to have 2 hands on the wheel while breaking or accelerating.

The Wheelchair mobility lift Waldoch works with is Braun and Ricon lifts, if you do have a different lift you would like to use that is not a problem. Again we work with Mobility companies all over the US, we build your beautiful van and your service center or one we find for you does the work on the mobility van. We work with many different models from the Klearvue Wheelchair lift and Scooter lift, it has the horizontal folding design to eliminate dangerous blind spots, which leaves an unobstructed view for the full-size mobility van driver as well as the passenger. The next one is the Clearway Wheelchair lift and scooter lift, this allows maximum interior space. These platform handicap lifts also feature an all steel frame and hydraulic pump for reliability that lasts for years. The next handicap lift is the Slide-Away wheelchair lift and scooter lift, a completely automatic, folding platform wheelchair lift that does not restrict movement of the front passenger seat. Slide-Away mobility lifts offer the strength of dual-post hydraulic lift plus the flexibility of a single-post lift.

- Working with any mobility installer in the US – American
- Understand the need and wants of the customer with ease of use in mind.
- Works with all different mobility lift companies
- Manufactures person use handicap and mobility van
- Manufactures commercial handicap and mobility shuttle vans
