

How to Qualify

- Be at least 18 years old
- Have a valid driver's license
- Receive a recommendation by an Instructor/Faculty Member at your school or college. Please attach to an application or discuss at interview
- High School graduate or GED
- Meet enrollment requirements for admission to your accredited school program
- Remain a student in good standing through graduation
- Meet Eide employment requirements
- Wear your Eide Uniform to class

Among Eide's most important core values is personal development and promoting from within. The organization takes training, education and development very seriously. All new associates go through a comprehensive orientation and training program upon hire. On-going training and development are also provided. As a result of this, Eide dealerships promote almost exclusively from within. This is very important as we believe our employees want to have opportunities for advancement and it is our job to provide those opportunities to deserving candidates.

Apprentice Technician

Our organization has a unique program for investing in and developing young technicians called Eide Tech Path. This program will allow you to obtain a certification in automotive tech while learning on the job in a realworld environment. As an Apprentice Technician, you will work under an experienced Master Technician who will help provide mentorship and skill development coaching. Automotive Technician is a sought after career field and we want to help you succeed in this growing, challenging, and rewarding profession by investing in you and providing you financial assistance.

Program Benefits

- Tuition Assistance up to **\$2,000** per year for completion of an accredited 2-year certificate or degree: a total up to **\$4,000**
- Paid, part-time or full-time work
- On-the-job career mentorship from an Eide Master Technician
- Eligibility for a **TOOL GRANT** of up to **\$5,000** at the time of hire into full-time employment after graduation
- A Stay-On bonus of **\$1,000** after 1 year of full-time employment with an additional **\$2,000** after 3 years
- Hands-on experience with state-of-the-art diagnostic technology & repair equipment

“ Our goal is to develop longterm employees who want to be successful & have opportunities for advancement ”

Responsibilities

- Assist technicians in diagnosing & repairing vehicles
- Test drive vehicles, test components & systems using diagnostic & special service equipment
- Learn how to diagnose & repair major vehicle components
- Perform repairs under warranty to manufacturer specifications
- Perform repairs as new skills are obtained
